

PERMANENT K-WALL LININGS

The Permanent K-Wall Lining system is a system which is solidly fixed to the wall, made of 3mm or 6mm KerMac compact laminate. It is a strong impact resistant system suitable for high abuse areas. It is also low maintenance, hygienic and easy to clean. This is a very cost-effective and durable alternative for wet or dry areas that need linings and has a wide range of applications to suit your project's needs.
